Topic 3 | Workflow Evidence

Data Validation, Cleaning & Duplicate Prevention

Evidence captured from user-provided n8n execution screenshots | 15 October 2026

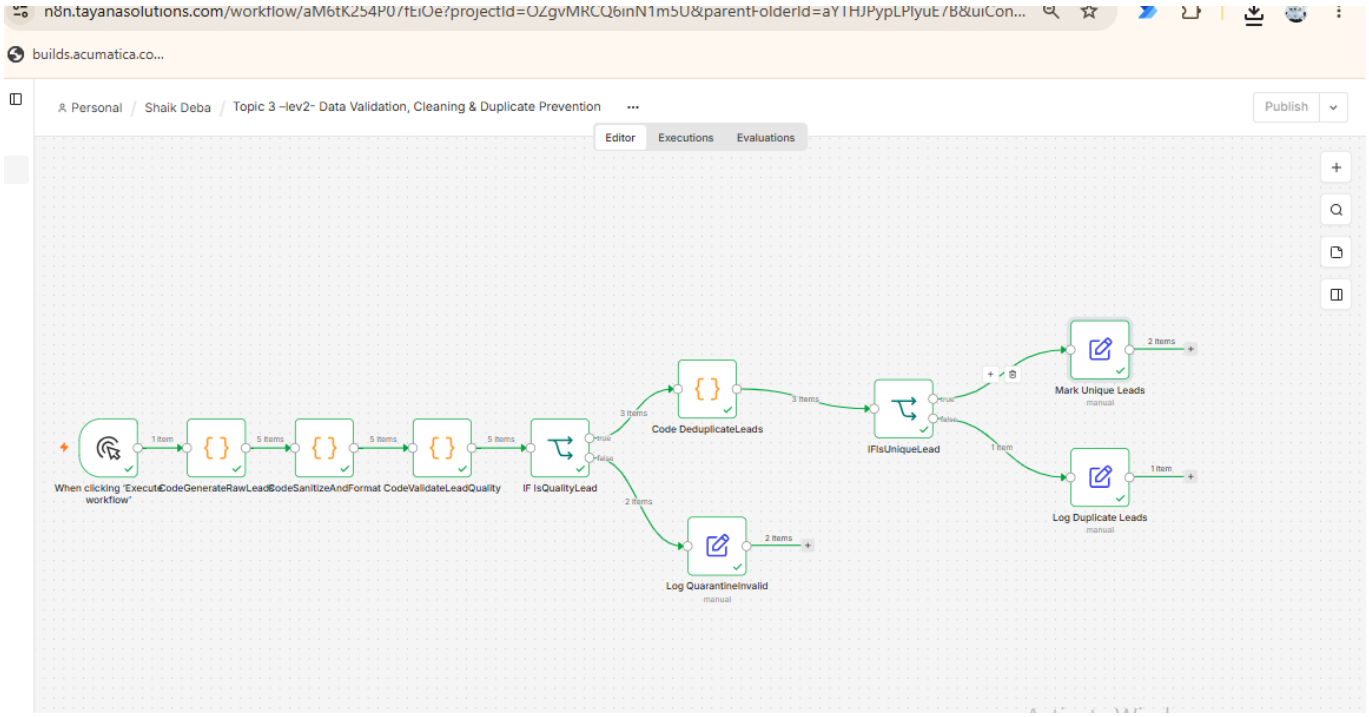

Measure	Observed
Mock leads generated	5
Passed quality check	3
Invalid quarantined	2
Unique accepted	2
Duplicates rejected	1

Result: The visible nodes executed successfully and all five leads were accounted for across the three outcome branches.

Scope note: The screenshots do not demonstrate mock CRM submission or the final metrics node specified in the implementation plan.

01 | Workflow overview

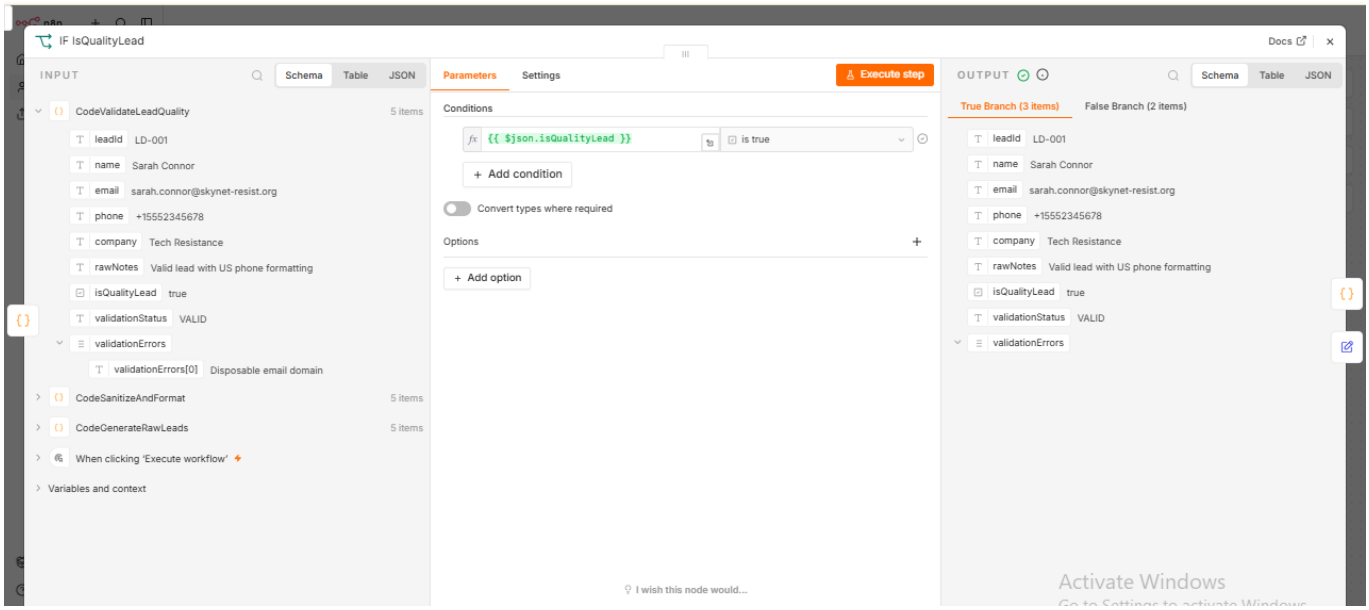

End-to-end canvas shows generation, cleaning, quality checks, deduplication, and three final routes.
